Agenda

All items on this agenda are scheduled for discussion and possible action, unless otherwise noted.

1. Discussion and Possible Action regarding the League's Position on Potential Data Center Legislation

The rapid rise of Artificial Intelligence (AI) in recent years has led to an increased demand for data centers to provide the processing backbone for AI operations. This has ignited conversations around data centers at the local, state, and national levels. There is a high likelihood that one or more pieces of legislation could be introduced during the 2026 session of the Arizona Legislature. Such proposals could directly impact cities and towns in Arizona.

League staff is seeking direction from the Executive Committee regarding the League's position on potential data center legislation during the upcoming legislative session.
